BOUTON® LENS TECH

POLARIZED XL5™
TECHNOLOGY

**FILTER REFLECTED SUNLIGHT
FOR A CLEAR VIEW**

Reflected sunlight from smooth surfaces, such as water, pavement, and snow can dangerously hinder vision and cause significant eyestrain. Polarized XL5™ lenses filter the scattered light by controlling the angle at which it enters the lens. The result is clearer vision of the surrounding area and greatly reducing eye glare.

ANTI-REFLECTIVE PLUS™
TECHNOLOGY

**THE CLOSEST THING
TO NOT WEARING GLASSES.**

Bouton® Anti-Reflective Plus™ lenses allow an astounding 96% Visible Light Transmission (VLT) compared to the 88-90% VLT provided by standard clear lenses. Durable Anti-Reflective Plus™ coating significantly reduces the amount of light that reflects back into the wearer's eyes providing ultimate visual acuity. Inspect, sort and see with more clarity – and less eye fatigue.

NOLOGIES

I/O BLUE TECHNOLOGY

PROTECT AGAINST HARMFUL BLUE LIGHT

Overexposure to blue light, including smart phones, tablets, and computer screens, have been known to cause eyestrain, fatigue and possibly contribute to long term macular degeneration. I/O Blue lenses are uniquely coated to help filter out harsh blue light and improve worker comfort and visual acuity. Lenses are treated with a contrast booster to enhance color contrast.

MIRROR PLUS™ TECHNOLOGY

TAKE ANTI-REFLECTIVE PLUS™ TECHNOLOGY OUTDOORS WITH MIRROR PLUS LENSES.

A mirror coating on the face of the lens will deflect sunlight from the wearer's eyes, delivering noticeably less glare and reflection than standard gray lenses. Anti-Reflective Plus™ coating on the back of the lens significantly reduces light reflecting back into the eye for enhanced comfort and performance.

IT'S NOT LESS FOG IT'S FOG

Standard Anti-Fog

FogLess® 3Sixty™ Technology

FOGLESS® 3SIXTY™
TECHNOLOGY

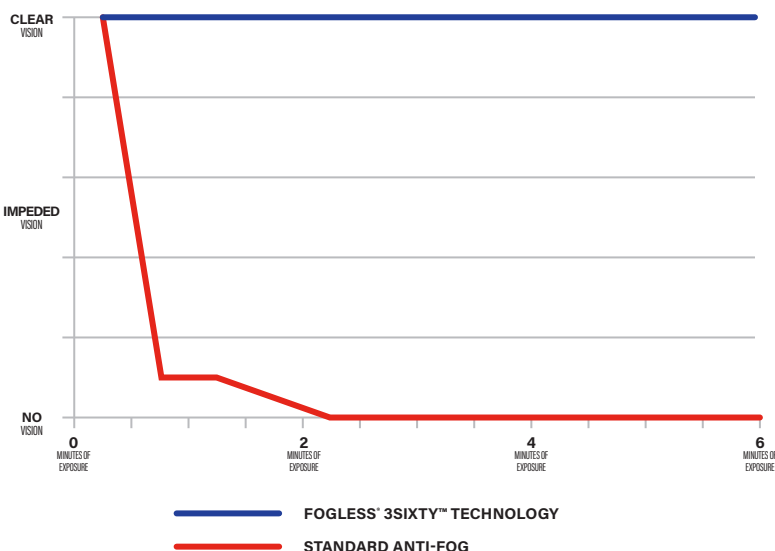

PROVIDING WORKERS CLEAR VISION IN EXTREME CONDITIONS

Lenses fog for many reasons, all of which are related to ambient temperature and moisture in the air. When a rapid temperature change occurs, micro-water droplets in the air will collect on untreated lenses, causing the lenses to fog and impede vision.

THE CHOICE IS CLEAR

Bouton FogLess® 3Sixty™ was tested in accordance to procedures outlined in the European EN 166 standard. In performing this test, lenses were pre-treated and repeatedly exposed to moisture for an extensive period, wiping continually to simulate harsh field conditions.

FOGLESS® 3SIXTY™ REMAINED CLEAR EVEN AFTER SIX MINUTES OF TESTING, NO OTHER PRODUCT WITH STANDARD ANTI-FOG TREATMENT CAME CLOSE.

OG, OGLESS®

HYDROPHOBIC TECHNOLOGY REPELS
MOISTURE AND PREVENTS FOG FROM
GATHERING ON LENSES

**FOGLESS® 3SIXTY™ TECHNOLOGY
PROVIDES THE ULTIMATE FOG PREVENTION WHEN:**

- :: Transitioning between warm and cool environments
- :: Working in a humid or wet environment
- :: Engaging in an activity that causes perspiration
- :: Eye protection is used with respiratory equipment
- :: Bonded durable coating resists cleaning and wear
- :: Enhanced hydrophobic action resists lens fogging,
providing workers with clear vision in extreme conditions

PERFORMANCE

Most eyewear on the market has only a light anti-fog coating that wears away quickly. Only Bouton® Fogless®3Sixty™ Technology applies a densely bonded coating that continues to bead away water and moisture, even after repeated cleaning.

CAUTION

Lens fogging inhibits vision and productivity, which may result in workers removing their safety glasses - exposing their eyes to debris and impact.

PIP's advanced FogLess® 3Sixty™ formulation was developed to adhere permanently to the lens, ensuring long-lasting performance that is able to withstand multiple lens cleanings.
