BOUTON[®] LENS TECH

ANTI-REFLECTIVE PLUS[™] TECHNOLOGY

THE CLOSEST THING TO NOT WEARING GLASSES.

Bouton[®] Anti-Reflective Plus[™] lenses allow an astounding 96% Visible Light Transmission (VLT) compared to the 88-90% VLT provided by standard clear lenses. Durable Anti-Reflective Plus[™] coating significantly reduces the amount of light that reflects back into the wearer's eyes providing ultimate visual acuity. Inspect, sort and see with more clarity – and less eye fatigue.

NOLOGIES

**TAKE ANTI-REFLECTIVE PLUS™ TECHNOLOGY
OUTDOORS WITH MIRROR PLUS LENSES.**

A mirror coating on the face of the lens will deflect sunlight from the wearer's eyes, delivering noticeably less glare and reflection than standard gray lenses. Anti-Reflective Plus™ coating on the back of the lens significantly reduces light reflecting back into the eye for enhanced comfort and performance.

—BOUTON® LENS TECH

POLARIZED XL5™
TECHNOLOGY

FILTER REFLECTED SUNLIGHT FOR A CLEAR VIEW

Reflected sunlight from smooth surfaces, such as water, pavement, and snow can dangerously hinder vision and cause significant eyestrain. Polarized XL5™ lenses filter the scattered light by controlling the angle at which it enters the lens.

The result is clearer vision of the surrounding area and greatly reducing eye glare.

NOLOGIES

I/O BLUE
TECHNOLOGY

PROTECT AGAINST HARMFUL BLUE LIGHT

Overexposure to blue light, including smart phones, tablets, and computer screens, have been known to cause eyestrain, fatigue and possibly contribute to long term macular degeneration. I/O Blue lenses are uniquely coated to help filter out harsh blue light and improve worker comfort and visual acuity. Lenses are treated with a contrast booster to enhance color contrast.
