

A full-page background image of a male worker in winter safety gear. He is wearing a white hard hat, black safety glasses, a black balaclava covering his face, and a bright orange high-visibility jacket with reflective grey stripes. He is holding a large metal pipe with his right hand, which is wearing a blue and black work glove. The glove has 'Flock' and 'PolyKorn' printed on it. The background is a snowy industrial site with various pipes and structures. The overall scene is in black and white with a color overlay on the worker's gear and the PIP logo.

PIP

COLD

CLIMATE PROTECTION

www.pipcanada.ca

Cold climate hazards impact millions of workers.

These hazards are not only caused by weather but also by refrigeration of cold storage facilities. In these environments, workers must wear proper protective equipment to regulate body temperature and to remain productive.

It's important to understand that even a slight drop in body temperature of 2°C (3.6°F) can lead to hypothermia when your body loses heat faster than it can produce heat. Hypothermia can inhibit the functions of vital organs such as the heart, leading to exhaustion, memory loss and fumbling hands, all of which increase the risk level of any job site.

For workers in cold climates, wearing insulated PPE is critical to maintaining proper body temperature. For certain types of PPE, the addition of insulation can often hinder performance with its added bulk. Through innovative design and technology, PIP® offers cold climate protection that keeps workers warm, safe and able to perform at their best.

Insulated Coated Seamless Cut Gloves

Construction / Transportation / Railyard /
Mining / Warehousing / Cold Storage / Oil & Gas

A5

GP418035

- Single-layer construction provides excellent dexterity
- Full hand coverage keeps hands warm and dry

A4

GP418014

- Single-layer construction provides excellent dexterity
- Coating provides excellent abrasion resistance and a good grip in dry and slightly oily conditions

A2

418150R

- Fibers made of 55% recycled polyester blended with acrylic
- Latex MicroSurface coating provides grip in dry, wet or oily conditions

A3

GP411415

- Hi-vis wrist for added visibility in poor conditions
- Double-dipped full hand coating provides liquid protection

A4

GP411417

- 15-gauge PolyKor® shell with 7-gauge acrylic lining provides thermal insulation
- Double-dipped full hand coating provides liquid protection

A3

GP16820

- Extended coating coverage to knuckle for added abrasion resistance
- Coating provides a good grip in dry, wet or oily conditions

A4

GP713WHPTPD

- 13-gauge HPPE/nylon shell with acrylic lining provides thermal insulation
- PVC foam coating provides a superior grip in dry and wet conditions

A4

GP713WHPTND

- 13-gauge HPPE/nylon shell with acrylic lining provides thermal insulation
- PVC foam coating provides a superior grip in dry and wet conditions

A6

GP418156

- 10-gauge PolyKor® / acrylic shell provides excellent dexterity and thermal insulation
- Nitrile foam coating provides a superior grip in dry and wet conditions
