

Dynamic[®] SRL-LE

LEADING EDGE SELF-RETRACTING LIFELINES

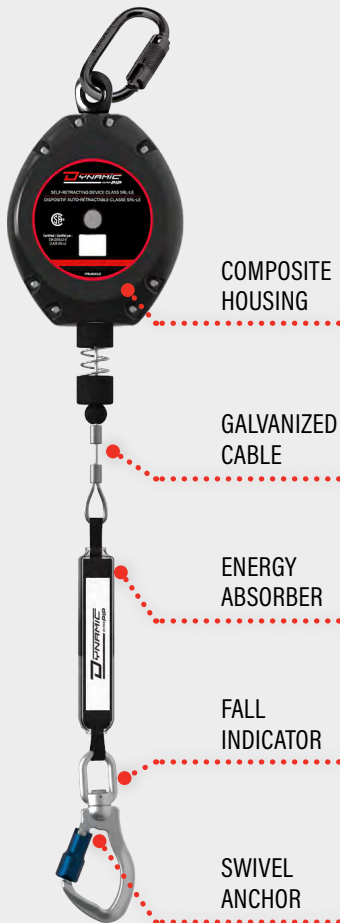

Our new leading edge SRL series is stronger and more durable than standard SRLs, allowing workers to safely tie off at foot level.

What is a Leading Edge?

They are the unprotected edge of a fall hazard. If a worker were to fall over a leading edge, the fall arrest system that the worker is wearing will contact and create a 90-degree angle over this edge. Standard SRL class lifelines may tear and snap in this situation, therefore CSA has added a new SRL-LE classification.

How does an SRL-LE protect the worker?

Leading edge SRLs are designed to be anchored below the user's D-ring and are tested to withstand a fall over a sharp edge. They also feature an external energy absorber that keeps forces manageable, ensuring these forces remain under the safe usage limits of both the lifeline and the worker.

FP2YY50CLE

Dynamic[®] SRL-LE Series

Auto-locking fall arrest device, designed for anchoring above and below the user's D-ring and approved for foot level tie off.

- Certified CSA Z259.2.2-17, Class SRL-LE
- Tested against leading edge applications
- Immediately reduces free-fall distance and force to the user in the event of a fall
- Ideal where fall clearance is an issue
- Swivel anchor point with carabiner included
- Durable composite housing for reduced weight versus steel alternatives
- External energy absorber
- Fall indicators identify if a fall event has occurred
- Available in 20 / 30 / 50 ft lengths
- Rated for 59 to 141 kg / 130 to 310 lbs
- Max arresting force of 8kN / 1,800 lbs

STYLE	TYPE	MATERIAL	HARNESSE CONNECTOR	ANCHORAGE CONNECTOR	CSA CLASS	LENGTH
FP2YY20CLE	Single	Galvanized Cable	Swivel Snap Hook	Triple Action Carabiner	CSA Z259.2.2-17	20 ft (6.1 m)
FP2YY30CLE	Single	Galvanized Cable	Swivel Snap Hook	Triple Action Carabiner	CSA Z259.2.2-17	30 ft (9.1 m)
FP2YY50CLE	Single	Galvanized Cable	Swivel Snap Hook	Triple Action Carabiner	CSA Z259.2.2-17	50 ft (15 m)
