

# DARE TO BE AWARE

## DID YOU KNOW?

Modern day safety innovations are replacing traditional forms of PPE to make workers more productive and comfortable on the job. Does your current PPE close the gap between comfort, protection & functionality?

### HEARING PROTECTION

New **Sustainable Ear Plugs** made from bio-based materials can instantly reduce a company's carbon footprint while providing the same necessary levels of comfort and noise reducing performance.

### ARM PROTECTION

**Single-Ply HPPE Based Cut-Resistant Sleeves** are replacing conventional 2-ply aramid-based cut-resistant sleeves where heat protection isn't necessary for a thinner, more breathable, and cooler wear.

### HAND PROTECTION

**High-Dexterity and Touchscreen Compatible Cut-Resistant Gloves** are providing workers with a more efficient way to work with touchscreen devices and an easier way to handle small parts with a thinner and more breathable wear.

### HEAD PROTECTION

**CSA Type 2 Hard Hats** ensure protection from impacts to the top, front, back and sides of the head. **Integrated Chin Straps** will ensure head protection does not fall off in the event of a slip, trip or fall.

### EYE PROTECTION

**Rimless Safety Glasses** with advanced anti-fog technology will ensure protected eyes and clear vision with no fog buildup or liquid accumulation- even after repetitive lens cleaning.

### HYDRATION

**Electrolyte-Based Hydration Formulas** are being integrated into everyday on-site offerings to keep workers hydrated and protected from heat stress in indoor manufacturing environments.

### WORKWEAR

**Workwear** is becoming lighter and more breathable without sacrificing quality or durability. Advanced fabric technologies are helping to limit bacteria buildup from sweat-keeping workwear fresher for longer. Women's PPE is a necessity to ensure proper fit for the 34% (and growing) of the manufacturing workforce.

### FIRST AID KITS

**First aid kits** are no longer required to meet province specific regulations. As of November 1<sup>st</sup>, 2024, CSA kits will be accepted in all provinces. Companies are placing smaller kits in more locations for better accessibility, rather than one large kit for the whole plant.
