High Quality Workwear

High visibility clothing is essential to not only protect workers in high traffic and situations with complex backgrounds, but also when the easy identification of emergency personnel is needed. PIP® offers multiple fabrics, coverage options and features to ensure that our PPE keeps workers both comfortable and protected from common hazards.

Safety Products You Can Trust

Over the last 10 years, PIP® has grown its product offering in personal protective equipment to deliver head-to-toe protection. Today, in addition to knit gloves and sleeves, we manufacture hard hats, face shields, ear muffs, ear plugs, fall protection, first aid, and more.

PIP
WORKWEAR

KEY TO SAFETY IN WORKWEAR

The standard that specifies the minimum requirements for apparel used for high-visibility purposes in the work environment is CSA Z96:22. Clothing that meets the CSA standard must be able to signal the presence of the user visually. It is also intended to provide conspicuity in hazardous situations specially in low-light conditions.

HIGH-VISIBILITY SAFETY APPAREL CLASSES

CSA Z96:22 places high-visibility safety apparel into three classes that are specified according to the body coverage that is provided.

CLASS 1

Is a basic harness with stripes of retroreflective material (or a combination of retroreflective stripes with background material) coming over the shoulders forming two parallel lines in the front and a symmetric X shape in the back and encircling the waist.

CLASS 2

Has a background material that covers the full upper torso (front, back, sides and over the shoulders). It must have retroreflective stripes coming over the shoulders forming two parallel lines in the front and a symmetric X shape in the back and encircling the waist.

CLASS 3

Is a Class 2 apparel with the addition of retroreflective stripes encircling both arms and both legs (at/or below the knees).

PERSONALIZATION

CSA Z96:22 allows the addition of optional patches and lettering for identification or personalization purposes:

- > If non-retroreflective patches or lettering are used, they must not cover more than 105 cm².
 - A maximum of 25 cm² on the front of the garment
 - Must not cover the retroreflective stripes on the back
- > If retroreflective patches or lettering are used, they must not cover more than 500 cm².
 - Additionally, they must not affect the recognizable pattern of the garment's retroreflective stripes

Bisley

BUILT TO GET THE JOB DONE

Bisley® Workwear is part of the PIP® Global family. For nearly 60 years Bisley® Workwear has been shaping the Australian workwear industry with unparalleled quality, exceptional service and value. Today, we are expanding the Bisley® brand across the globe providing workers with the ultimate in comfort, durability and safety.

Heating Technology

Designed to provide long-lasting relief from cold weather conditions, the Boss® Therm™ heated product line has three easily adjustable heat settings, for effective warmth even in the harshest of conditions.

Scan it

Revolutionary heating technology at the press of a button

- Utilizes innovative flexible heating panels built into the chest and back
- Three individual temperature settings - low, medium, and high range

Powerful 5-volt rechargeable power bank with an integrated USB plug in cord, provides up to 5 hours of heat on the low setting.

Includes a convenient remote control allowing the wearer to quickly adjust the temperature settings and continue working without removing clothing layers.
