

DYNA-CLIC™ MAGNETIC CHIN STRAP INSTALLATION GUIDE

Our 4-point chin straps easily install onto your existing Dynamic® hard hat suspension, with two possible placement positions.

1 Locate the front and rear suspension loops, marked as 1–4 on the diagram.

2 Pass each of the four snap ends through the suspension loops, and firmly secure in place with the plastic snap buttons.

For a larger fit, instead of using the rear loops, attach directly to the headband (marked A & B on the diagram).

3 Lastly, adjust the strap divider until it sits beneath your earlobe, with the chin strap positioned against the bottom of your jaw. It should be snug enough to squeeze two fingers between the strap and your chin.
