

NEW AND IMPROVED FEATURES. THE SAME PERFECT FIT.

The easiest way to describe the PIP Global Safety Perfect Fit 3.0 safety gloves? Simple: Exceptional comfort and ease of use.

PERFECT FIT. NEW AND IMPROVED FEATURES.

It's always challenging to find in one glove the right balance between comfort, dexterity, protection and performance that provide the needed level of safety and efficiency. To help achieve this balance and enhance the level of hand protection for workers in various industries and applications, PIP Global Safety has re-engineered the Perfect Fit offering, designing a new and improved range of safety gloves.

Here are its most important new features.

Antistatic

If you work in environments with possible explosive atmospheres – which might be the case when working with air-dust-mixtures like in silos, conveying, mixing and milling systems, for example – it is dramatically important to prevent electrostatic charging and inflammable discharge which could cause an explosion. The antistatic PIP Global Safety Perfect Fit 3.0 gloves help prevent such incidents with their specific vertical resistance.

Higher gauge

When it comes to gloves, the higher the gauge, the better the fit, dexterity, breathability and overall user comfort. We have improved liners with a higher gauge count for all gloves in the Perfect Fit 3.0 range, which means they fit hands snugly and enable workers to perform precise tasks with ease with no lower gauge than 18 for all cut levels.

Touch screen operation

In today's world, workers need to stay connected and productive even when wearing gloves. To help enable that, the PIP Global Safety Perfect Fit 3.0 Gloves have touch screen operation, which means workers can use their smartphones or tablets as well as machine control panels without taking off their gloves. This way, they do not risk working without appropriate protection or lose time for taking off and putting on the gloves while having to operate screens.

Clear markings on gloves

When using gloves, workers and safety engineers need to make sure they always have the right information easily accessible to ensure worker safety. Thus, a clear marking certifies the quality of the gloves. That's why we designed a tidier marking for the Perfect Fit 3.0 range including everything you easily have to capture at a glance to make the right decisions.

NEED SAFETY GLOVES THAT BEST FIT YOUR WORKERS' HANDS?

PIP Global Safety HAS EVERYONE COVERED.

The new PIP Global Safety Perfect Fit 3.0 gloves are built to offer top protection, comfort and grip, while also meeting the highest standards of quality. Here are the main user benefits of the Perfect Fit gloves in more detail:

Enhanced Comfort and Durability

When you work with your hands, you need comfortable and durable gloves. That's why the PIP Global Safety Perfect Fit 3.0 gloves are designed to give you the best of both worlds. They have a lightweight, glass fiber-free design and a breathable coating that helps provide workers with all-day comfort. The gloves are also washable, extending their product life and lowering the ownership cost.

Plus, our new gloves are silicone-free, a crucial requirement for applications in the Automotive industry.

The Perfect Fit 3.0 gloves benefit from a thin lining which enhances the wearing comfort and the dexterity of the workers. Furthermore, they meet the requirements of the EN 16350 standard for antistatic gloves and have a food certification, which means they are safe to use in working environments with possibly explosive atmospheres as well as food handling where workers need comfortable hand protection for extended lengths of time.

Glove Selection – Made Easy

Choosing the right gloves for your job can be challenging. You want to make sure you have the right level of cut protection, but you also don't want to waste time and money on gloves that don't fit your needs. That's why the PIP Global Safety Perfect Fit 3.0 gloves have a proven color-coded system that makes it easy for workers to identify the cut protection level: Red, yellow, green and blue correspond to cut levels A1/A, A2/B, A3/C and A4/D, A5/E and A6/F respectively.

The gloves meet the latest EN/ANSI standards for cut protection, which ensures that the gloves provide consistent and reliable performance. Plus, to help avoid confusion and increase user protection, the outer markings, in addition to the cut level, include the size and the batch number.

Put On Gloves to Cut Off Risks

Working with sharp, abrasive or oily objects can pose a risk of injury to your hands. You need gloves that can protect you from cuts and abrasions. That's why the PIP Global Safety Perfect Fit 3.0 gloves provide slip resistance and a high level of abrasion protection to help protect workers from those injuries.

The gloves have a special coating that enhances the grip and a lightweight design that enables workers to handle small parts without removing their gloves. The material composition of both liner and coating enables wearers to seamlessly operate touchscreen devices, which means they can use smartphones, tablets or machine control panels without taking off their gloves, helping to enhance productivity and speed on the job.

INDUSTRIES

- Automotive
- Machinery and Equipment
- Metal Fabrication
- Warehousing and Logistics
- Manufacturing
- Construction
- Transportation
- Food Handling and Processing

APPLICATIONS

- Handling sharp objects
- Painting and surface inspections
- Chassis assembly
- Mounting and dismantling
- Maintenance
- Fastening components and parts

FEATURES AND BENEFITS

- High grip performance
- Touch screen operation
- Color-coded markings
- Coating breathability
- Lightweight
- Low content level of DMF (<100 ppm)
- Antistatic
- Silicone-free
- 18-gauge liners in all cut levels
- Food certified

ITEM NUMBERS - ORDERING INFORMATION

SKU	GAUGE	DESCRIPTION	CUT LEVEL AND CODING COLOR	ANSI/ISEA	EN 388:2016
NPF21-0118N	18	Grey liner (nylon, carbon, elastane) with black PU coating	A1 A	Abrasion 2 Puncture 2	2121A
NPF22-0118N	18	Black liner (HPPE, nylon, carbon, elastane) with black PU coating	A2 B	Abrasion 3 Puncture 3	3X42B
NPF23-0118N	18	Grey liner (HPPE, nylon, carbon, elastane) with black PU coating	A3 C	Abrasion 3 Puncture 3	3X42C
NPF24-0118N	18	Grey liner (HPPE, nylon, carbon , elastane) with black PU coating	A4 D	Abrasion 3 Puncture 3	3X42D
NPF25-0118N	18	Grey liner (steel, HPPE, polyester, carbon, elastane) with black PU coating	A5 E	Abrasion 3 Puncture 3	3X42E
NPF26-0118N	18	Grey liner (tungsten, HPPE, polyester, carbon, elastane) with black PU coating	A6 F	Abrasion 3 Puncture 3	3X42F
